Your Ironmongery, Signage & Flooring Partner...

ABS • SINGAPORE • KUALA LUMPUR • JAKARTA • HONG KONG • GUANGZHOU • SHANGHAI • BEIJING

ABS Ever since her incorporation as ABS-Kimsign in 1987, ABS-Kimsign (Singapore) Pte Ltd has been providing building products within Singapore market for almost 30 years. In 2007, ABS had undertaken a management restructuring with an objective to provide a much more comprehensive service as well as technical support not only for the local but also overseas market too. She was since then known as **ABS Building Products Pte Ltd** (here after as "ABS").

With her headquarter located in Singapore, ABS' core competitive strengths are in **high security architectural ironmongery, informative signage, quality recycled timber decking and premium vinyl flooring.**

Being a **Building Construction Authority (BCA) registered sub-contractor**, ABS is honoured to receive **Singapore Outstanding Enterprise Award** and **Bizsafe Certificate Level 3**. Most of our products are tested to **CE/ EN European Standard, SS332:2007 Singapore Standard, Green Label** and **Certificate of Fire-rated Ironmongery** etc respectively.

ABS' principle is always to provide some quality, innovative and "green" products for the building industry within the region. We work closely with the owners, architects, designers, contractors and sub-contractors in order to make sure that all designs specifications done meets both Architects' / owners' vision and at the same time conforms to the various Building and Safety as well as the "Green" codes.

Her experience spread horizontally over Commercial, Hospitality, Institutional and Residential projects as well as geographically along **Brunei, China, Hong Kong, Macau, Indonesia, Malaysia, Thailand** and so on.

BREHAT

There is an island of flowers on Pink Granite Coast in Brittany, where the magic of the glass-blowerses goldsmiths' finger give rise from the melting of glass, gold and silver to masterpieces that offer furniture and decoration unique pieces.

The Bréhat door handles, which consists of a crutch or a button on rose or plate, is manufactured through making use of traditional craft techniques on Bréhat glassware. Two complementary and refined lines:

- The range of door handles SEDUCTION, coloured or colourless, always refined.
- The range of door handles PRESTIGE, luxurious, sumptuous or otherwise very pure, sober.

The prestigious "Living Heritage Company" label was awarded to the Bréhat glassware by the French State in recognition of rare and renowned expertise.

A second "Talents of France" label has been awarded to their top talented production realized in France.

BRIO is recognised around the world as a market leader in the field of Bi-folding door and window hardware.

Brio is passionate about shaping the spaces in which people live, work and play producing cutting edge screen solutions, tracks and hardware kits for sliding & folding door systems in both interior & exterior, residential or commercial spaces. It specialises in door hardware, sliding door hardware systems and folding door hardware systems.

Giving special thanks to BRIO's heavy duty sliding / slide & fold door system, ABS managed to provide an enlarged "Open" space for the campus of the Open University of Hong Kong without any intermediate interfering columns.

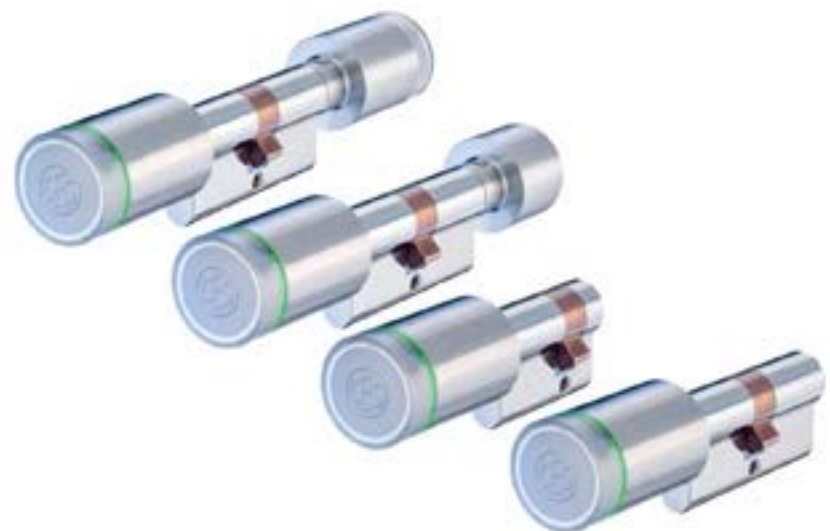

Your Ironmongery, Signage & Flooring Partner

CES Based in Velbert, Germany, CES is an internationally leading manufacturer of locking systems and electronic access control systems with a history that dates back to 1840. Since then CES has been pioneering the industrial production of locking cylinders in Europe and the entire world. In addition to the **cylinders**, the two subsidiaries CESTronics and CESTlocks round off the product portfolio.

CESTronics offers a range of time- and identity-based access control solutions. Using state-of-the-art radio and transponder technology, CESTronics products afford superior flexibility in the design of access authorizations that offer a **maximum of security so as convenience.**

CESTlocks manufactures high-quality mortise locks for demanding industrial and commercial building applications and offers **innovative lock solutions for special requirements.**

COCOON is leading in the high end sanitaryware market with a lot of design inputs from the famous designer **Piet Boon** especially in taps and basins collection. This elegant beauty is showcased in the **Red Dot Design Museum in Essen, Germany**, world's largest Museum of Contemporary Design. The Collection designed by Piet Boon is available in **brushed stainless steel, Gunmetal Black and Raw Copper** exclusive finishing.

COCOON stands for craftsmanship, timeless design and sustainable materials. **Made to last a lifetime.** This vision reflects into her exclusive bathroom collections and international design projects. Timeless and sturdy design is only one side of the coin. By using real sustainable materials and having the right people shaping these into pieces of usable art, our products will even make the difference after decades of use.

COMIT

COMIT's decorative lever handles are truly unique and offers complete solutions to both your residential and commercial needs.

Browse their extensive collection of products inclusive of all aspects of creative architectural ironmongery, both classical and contemporary designs. On top of her unique and sophisticated door handles, Comit also offers stylish portholes, as well as iconic sinks and urinals.

Offering a big variety of different finishes is no doubt the core competitive advantage of Comit. **Most the finishes are warranted for 10 years which** only a limited few players in the market can match.

Furthermore COMIT Glass provides a comprehensive range of glass hardware in compliment to their standard range of timber door hardware.

CVL has been manufacturing locks, specially for the aluminium sector, since 1935.

With more than 70 years within the locksmith's industry, it has given CVL a wide knowledge of locking systems. CVL is, in particular, specialized in locks for aluminum frames, metalwork and emergency exit doors.

CVL's locks are guaranteed to fulfill customers' stringent requirements by means of a complete customized service with reference to the **European Certification**.

DiTEC has always strived to meet the mandatory of an industry which, alongside a safe and industry-standards compliant product, is now essential to be supplied with the correlated documents and information which ensure a correct installation of our automations and their compliance with appropriate standards.

In addition to their sliding and swinging pedestrian automatic doors, DiTEC also offers heavy duty automatic gate operator as well as industrial high speed doors. DiTEC offers a "one-stop" solution of all your automatic door requirements.

DORCAS sells their products in more than 70 countries of five continents. DORMA

With more than 100 years of tradition behind it, DORMA has developed in revenue terms into the world market leader in door controls, movable walls and glass fittings and accessories. In the automatics segment too, the company is a member of the world elite. DORMA is also a successful player in the security; time management and access control segment and the number one in Germany for emergency exit control and escape route security systems.

Full range of products and services provides safety and security as well as convenience and comfort.

DORMA also features a design oriented portfolio of architectural door hardware, specialty hardware for glass door and wall applications, door automation systems including Crane Revolving Doors, and operable wall systems featuring Modernfold.

FORMANI

Their customer's wills and needs are most valued. Their mission is to supply innovative, exclusive and top-quality hardware to form the perfect detail for high-quality interior designs worldwide. **Formani offers exclusive door, window and furniture fittings and even specialty bathroom accessories.**

It is a 100% Dutch Design company and the main theme behind the Company is **"Hardware Designed by the Dutch Architects"**.

Every single piece of hardware is designed based on aesthetical vision as well as years of experience of a Dutch architect.

The Japanese interior designer of M Residence at **Paterson Suites**, at the heart of Orchard Road, has specially chosen **FERROVIA series from ABS**, as the major door hardware line for this prestigious condo unit.

DESIGNER PIET BOON

DESIGNER EDWARD VAN VLIET

FritsJurgens

The FritsJurgens pivot door

system stands out as all the technology is in the door. This makes the **interface with the floor subtle and stylish.**

As a floor box – needed in the case of a traditional pivot door – requires a recess in the structural shell of the floor, this requires attention and coordination between several parties at an early stage of the construction. The precision of the dimensions of the recess is often in contrast with the scale of the processes of the structural shell work. The recess for the floor box then requires attention at every stage of the construction

process in order to avoid damage.

FritsJurgens changes this construction process. The FritsJurgens hinge makes it possible for the first time ever to use a pivot door without having this device in the floor. This hugely simplifies the construction process: **the door can now suddenly be fitted during the last stage** of the construction and is therefore a lot less vulnerable to process risks and damage.

This is made possible by fitting the FritsJurgens mechanism not in the floor but in the door.

HALLIDAY & BAILLIE

(H & B) range of architectural hardware is supplied to discerning customers around the world who demand distinctive and quality design. At H & B, their products are not only a branded appendage - it is a piece of architectural hardware design and engineering, which is inspired to complement an aesthetic vision.

Unlike other hardware suppliers, H & B is only focused on sliding and pocket door hardware product which makes them leading in this unique market segment.

ABS
16

MINUSCO

is an international network that issues accessories for tempered glass. Float glass manufacturers can be dependent on its branches to offer installers ideas that are based on an international catalogue, but also take local differences into account. They have specifically exclusive right of sale for Colcom products.

Being the inventor of the hydraulic hinges, Minusco holds the worldwide patent of the oil-dynamic self-closing technology. Similar to FritsJurgen, Minusco allows the self-closing mechanism on the glass door itself, no more floor box is required onto the floor.

ABS ironmongery designers proposed ample use of COLCOM glass hardware at the Open University of Hong Kong to enhance the spacious concept of which allows frameless glass panels on both interior and exterior spaces.

...Your Ironmongery, Signage & Flooring Partner

NEMEF

They strive to offer customers the broadest product range ever. It is their goal to provide the full door opening solutions, which is why our portfolio reaches from mortise locks to access control and from cylinders to architectural hardware. You can be rest assured that whatever you pick, you will always receive products designed and manufactured to the highest standards.

NEMEF also provides an introduction to the world of lock, with instructional manuals to help make identifying needs, selecting products and to achieve an all rounded solution to a full door opening solution.

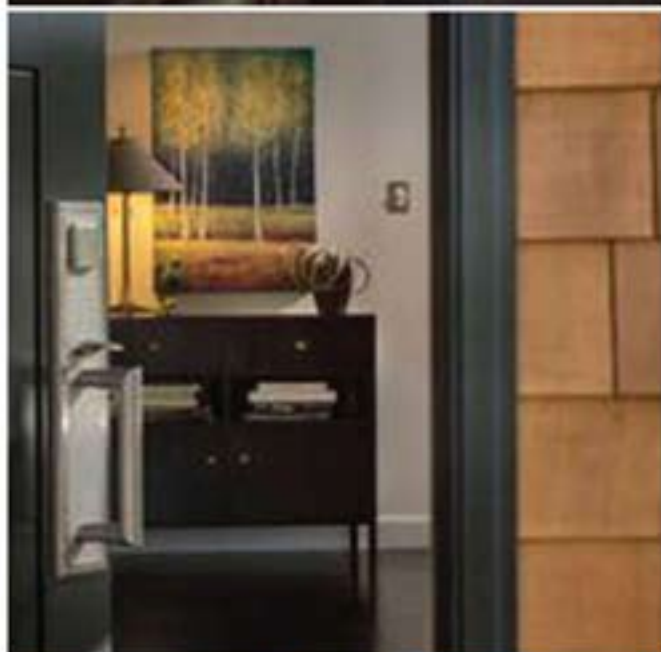

All this makes NemeF the perfect partner for safe, accessible and convenient door opening solutions.

OLIVARI

since 1911 has been manufacturing handles at its own factories in Italy where the entire production process takes place. Starting with brass billets, the handles are forged, milled, polished, buffed, chrome-plated and hallmarked with a **laser. OLIVARI has attained ISO 9001 and ISO 14001 certifications.** Though it uses the most advanced technology, OLIVARI preserves all the artisanal wisdom it has accumulated in 100 years of history.

Adding to the glamour of South Beach, one of the finest brands in the world - OLIVARI handles were supplied by ABS. Though South Beach is such a remarkable architecture in Singapore, it's merely one of the numerous OLIVARI job references within this small island.

ROCKY MOUNTAIN

products allow seamless integration of design, from the main entrance hardware, throughout the public spaces and guest suites. They offer ADA compliant door hardware, along with decorative trim for electronic card locks, panic devices and other security hardware products.

Rocky Mountain Hardware began as a family owned distributor and showroom for other manufacturers' architectural hardware. Over time Rocky Mountain is able to establish his name as the leading brand of classic hardware within the USA market.

At Clear Water Bay Country Park, Hong Kong, the unwavering commitment to high-quality, custom bronze pieces by Rocky Mountain is unparalleled to project the slogan of "the creation of that next sculptural work of art".

SFS - Inspired by the latest trends and mindful of the needs of the end user, in recent years, SFS intec has introduced a complete programme of hinges for steel and aluminium house doors onto the market.

The aim of this development was to offer customers a product addressing the need for extreme load bearing capacity for heavy-weight external doors, whilst offering easy installation and adjustment.

The high corrosion resistance of these hinges, fitted with security shafts as standard and available in a wide range of colours and materials, provide every door with a quality design and aesthetic appeal.

F.A. PORSCHE

- Since the creation of studio by Ferdinand Alexander Porsche in 1972, they are striving for the perfect symbiosis of form and function. Design is not only aesthetics to them, but above all content. This philosophy combined with the legacy of German engineering, forms the basis of their work.

Recently, Studio F.A.PORSCHE launched a new product and develops brand strategies for clients worldwide honouring the philosophy of its founder F.A.PORSCHE.

Based on these mutual design approaches, HAFI and Studio F.A.PORSCHE both created timeless and elegant door handles for exclusive real estate projects. Whenever somebody is entering a room, the door handle exhibit the first touch & impression. The demand for haptic and visual quality has to be considered equally. Thus the door handle turns into a building's corporate image.

TOPP was founded in 1996 as a merger of creativity, technical skill and experience in the development of cutting-edge products.

The quality of the materials and the innovative ideas applied, combined with technical reliability and modern design, enabled Topp to achieve a position of international renown in the sector of automation for doors, windows, domes and skylights.

WEST - simple but not minimal,
unique but not harmonious, functional and yet
beautiful.

Inheriting the spirit of hospitality, WEST has produced a range of products based on a conical form no matter how the era and the times might change, they wish to continue producing products that will welcome people who are heartwarming and sincere.

Designed and manufactured entirely in Japan,
this is the concept of WEST.

DANSIGN

Being a supplier of architectural and flexible way finding systems and sign solutions of high quality and unique design, DanSign is always a loyal partner for the architects and designers in terms of the signage requirements.

The key to DANSIGN's success lies in an uncompromising focus on design, high quality, flexibility and the ability to think differently and to

provide outstanding customer service. This combined with constant product development, is the reason why our customers come back to DanSign with new projects year after year.

In Singapore, **ABS** specified **DANSIGN** in **Hong Leong Building** which can be changed and updated easily by means of just a **proprietary magnet** providing **superb flexibility** for estate management

to cope with fast changing space requirements.

Fully utilizing the capability of **DANSIGN** by **Mount Alvernia Hospital**, **ABS** has not only helped the hospital to **upgrade signage system into four languages** but also provided a signage platform which **allows the hospital to change uses of space much easier than before**.

...Your Ironmongery, Signage & Flooring Partner

MODULEX

Founded in 1963 by the Lego group, MODULEX is a leader in signage and environmental graphics. You'll find their work around the world; on the high street, in airports, company headquarters, hospitals, stores, showrooms, schools and universities.

They offer the complete signage and environmental graphics package; project management, way finding systems, manufacturing, product sourcing, logistics and installation. And with decades of experience and an international network covering more than 45 countries, they provide trouble-free implementation anywhere in the world. Supplied by ABS, Barclays Bank, Singapore fully utilizes Modulex's benefit of Scandinavian signage system with potential for future expansion.

X-SIGN

was introduced alongside the D-LINE line range in 2006 and fulfilled the Jigsaw concept by adding multiple material choices to the secret **fixing system**. Their products are not only innovative; they also capture the concept of original classical design.
